

OUR OFFER

Security Awareness

Strengthen the “weak link” of the company safety chain.

The statistics are clear: the largest share of successful cybercrimes is determined by human error, a lack of awareness. Often this type of attack causes economic damage with economically devastating effects on the companies that are victims of it. For this reason, it is clear that the strengthening of the weak link in the safety chain can only go through the constant and capillary training of company staff. In this sense, the e-Learning mode is the ideal choice as it allows to provide a capillary, constant and effective training. This course developed thanks to modern Authoring tools is characterized by a strong interactive component that allows a strong involvement of the learner and therefore a high degree of effectiveness.

How to use

The course, delivered through the **Moodle** company platform, is characterized by the presence of more than one hundred slides with audio commentary and interactive teaching tools that will allow the learner to consolidate the contents of each individual section
